Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 7, 8, 16, 19, 20, and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Chliwnyj et al (U.S. 6,067,211). A magnetic head 22 and a magnetic tape are moved relative to each other. A first zone is where the tape leader is pulled from the single reel tape cartridge and a tape is wound around reel 23 and the head writes data to and reads data from the tape. A second zone is when the tape is within the single reel tape cartridge. A head cleaning section 66 cleans a head. The cleaning arrangement includes a spring 94 which will have a damping influence on an applied force during a cleaning operation. Lever arm provides an applied force on a brush towards the magnetic head and the spring has a damping influence in the same direction. The cleaning section includes a brush, which reads on a textured surface.

Allowable Subject Matter

3. Claims 2-6, 9-15, 17, 18, and 21-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
